

Bringing the owner, design and construction teams together...

THERMALTECH'S FACILITeBANK™

**THERMALTECH
ENGINEERING**
FACILITeBANK™

*Accelerating the flow of organized information.
Increasing accessibility to all team members.*

Design & Construction Collaboration

We're raising the bar on service by using FACILITeBANK™ on every project and you are invited to join us. Owners, architects, vendors, and contractors can now exchange information and have complete access to all project documents via the Web.

Benefits include:

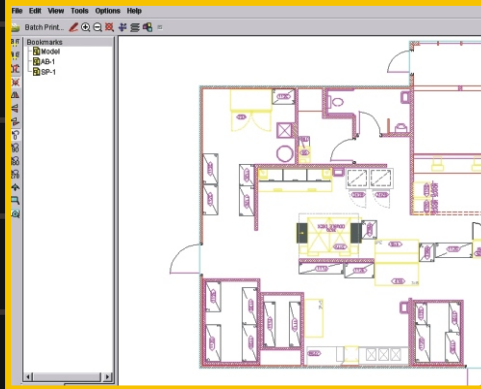

- Share and collaborate on documents electronically (i.e. drawings, specs, RFIs, bulletins, submittals, meeting minutes, reports, photos, etc.)
- Keep an Action Item List during the design phase to which all design professionals can post
- Access information instantaneously throughout the design and construction phases
- Streamline communications, shorten project schedules, increase productivity and reduce costs
- Increase accountability due to time stamping and audit trails
- Start quickly: Windows-based client is very user-friendly, no software to buy or load

An example of the time savings: contractor posts an RFI to the web (including digital photos or other attachments), target designer(s) notified by e-mail that an RFI has been generated, designer responds via the web with the response and any attachments, issue closed in hours rather than days.

ThermalTech can share FACILITeBANK™ with you at very attractive pricing a fraction of the cost purchasing & maintaining your own collaboration service. The project benefits will easily offset the cost hence it's **virtually free** to the Owner.

#	Number	Revision	Title	Due Date	Creation Date	RFI Creator
1	3	0	Electrical Panel	3/16/2005 05:17 PM	2/25/2005 05:17 PM	Electrical Contractor

Track RFI's, Submittals, Action Items, etc. on-line

View & redline over 250 file types, including CAD

Can't find the documents you need?

Facility Management Documentation

Secure, Centralized Documentation

FACILITeBANK™ allows you to download and print all documents from any workstation. All files are organized on secured servers and information is readily available to anyone you specify on several different access levels.

Ideal for existing facility documentation or for completed project data.

Instant Access, Virtually Anywhere

All CAD plans, specifications, O & M Manuals, company procedures, and other important documents can be hosted on-line through FACILITeBANK™. Team members can access all of this anywhere Internet access is available.
