TECHNOLOGY SPECIALISTS

COMMUNICATIONS, LIFE SAFETY  
& AUTOMATION

*Raising the bar to deliver superior  
return on your Technology investment.*

The time for change,  
for a better choice is...

**NOW!**

Tired of coordinating and paying multiple vendors only to discover your Technology systems aren't as efficient or integrated as you expected?

Our Technology Group is dedicated to helping you achieve better integration of your communications, life-safety and automation systems (CLA in the CSI MasterFormat 04) at a lower total cost of ownership.

How? We apply our expertise in a wide-variety of Technology systems to engineer and, if you elect, lead an integrated turnkey installation. Typically, we design this infrastructure so multiple systems can operate over the same network, which affords you economy of scale. Being vendor neutral and using open-book pricing, we obtain competitive bids. This gives you better pricing than sole-sourcing to separate vendors.

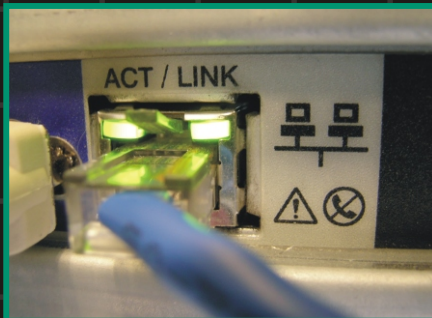

**Here's our promise to you:**

- Innovative expertise (over 34 awards)
- Experienced leadership
- Standards-based design
- Vendor neutral
- Open-book turnkey solutions
- Cost-effective results

*ThermalTech is a member of BICSI.  
Registered Communications Distribution  
Designer (RCDD®) on staff.*
