

CONSTRUCTION MANAGER – INTERNSHIP/CO-OP

ThermalTech Engineering is a Cincinnati-based consulting firm of over 100 highly skilled engineers specializing in Utility and Facility engineering since 1980. We have offices in Ohio, Michigan, Indiana, Tennessee, Texas, and Pennsylvania and are currently seeking a Construction Manager to expand our turn-key service offerings to our existing customers.

We train and support motivated individuals to maximize their opportunity to succeed, and we reward their efforts with competitive salary and benefits, a generous performance bonus program, and excellent growth and advancement potential.

Qualifications

- US work authorization required
- Completion of at least one construction management related co-op/internship preferred
- Ability to manage customers, contractors, and vendors
- Strong computer skills including experience with AutoCAD, MS Excel, MS Word, MS Project, and project management collaborative software
- Great problem solving and communication skills
- Understanding of and commitment to doing what it takes to earn long-term customer loyalty (our company enjoys a repeat business rate of more than 95%)
- Understanding of mechanical equipment design and fabrication is preferred
- Working knowledge of industrial utility systems including Steam, Compressed Air, Chilled Water, and HVAC systems is preferred
- Understanding of construction documentation
- Co-op/internship assignment location is at a distillery in Frankfort, KY.

Responsibilities

Candidates work with ThermalTech's design team, customer's engineering/maintenance personnel and contractors as part of project specific teams. Team size varies depending on project size and complexity. Major responsibilities include, but are not limited to:

- Project development and scoping
- Construction documents review
- Construction bidding, evaluations, and recommendations
- Development of construction contracts

THERMALTECH ENGINEERING
